- FIG. 8 -

A cross-sectional view of a piezoelectric transducer assembly. At the bottom is a rectangular block labeled "ULTRASONIC TRANSDUCER" with reference numeral 36. A vertical line representing an electrical connection leads from the top of the transducer to a rectangular block labeled "DRIVER CIRCUIT" with reference numeral 34. Above the transducer is a large, U-shaped cavity labeled 38. The top of this cavity is defined by a curved surface labeled 50. Above the curved surface 50 is a thin layer labeled 46. Above layer 46 is a layer of small circles representing a piezoelectric material, labeled 40. Above the piezoelectric material is another thin layer labeled 48. Above layer 48 is a rectangular block labeled 44. The entire assembly is enclosed within a larger structure labeled 18, which has a side wall labeled 42. A reference numeral 66 points to the interface between the piezoelectric material 40 and the layer 46.
